

Index Fact Sheet

UBS Diapason Global Biofuel Index (UBS-D GBFI)

General Information :

Index Name:	UBS Diapason Global Biofuel Index (UBS-D GBFI)
Index Sponsor :	UBS, Diapason Commodities Management S.A.
Index Specifications :	The Index will cover a range of commodities used in the production of ethanol and biodiesel. The Index, which is composed of various commodity futures, is weighted to reflect the importance of each individual commodity used in the production of ethanol and biodiesel as well as the liquidity of the underlying futures. The Index is built primarily on the basis of underlying production data. Because biofuel markets are likely to evolve dramatically in the next few years, this basis provides the strong fundamental statistical evidence necessary to establish a climate of technical confidence for the Index. But liquidity remains the key to all investment decisions. Secondary rules based on liquidity, market deepness and open interest, provide the necessary link between fundamental and financial reality and help to establish the Index as a stable, reliable, and adaptable benchmark.
Company Overview :	Diapason Commodities Management is one of Europe's largest commodity investment managers. The company's mandate is to build, manage and distribute investment products designed around commodity indices and commodities in general.
Launch Date :	28/02/2006
Initial Index Value :	1000.00
Currencies :	Calculation in USD, EUR, CHF and JPY
